

# Get Ready For Github

## I - Installation of necessary Software

### Install Git

- Download git from <https://git-scm.com/downloads>
- Install by default

### Install Github Desktop

- Download installer from <https://desktop.github.com/>
- Install by default

### Get a Github Account

- Register on <https://github.com/>
- Wisely choose a name (best no Fun names)

## II – Advanced (if want to try)

### Try to find me

- Try to find the account “Envimaster@combat” aka “SchoenbergA”
- Feel free to follow (its not like insta or facebook 😊)

### Try to clone a Repository

- Try to find my R-Package “LinguGeo”
- Go to “code” and choose “clone” -> you get an url
- Open GithubDesktop and choose “File -> clone repository”
- Choose “url” and paste the url
- Choose a local path where the Repository should be cloned to
- Well done now you should have exactly the same data like me :D
